Learn, Laugh, Create, WonderWorks Science Week is Back!

Syracuse, NY (February 8, 2017) – Science Week is back by popular demand! Following the success of Science Week 2016, the team at WonderWorks is thrilled to be hosting the program this February. Starting on February 20th through the 24th, a variety of entertaining and STEM educational activities will take place inside the amusement park for the mind.

A daily individual ticket to each science event can be purchased for \$10.00. A VIP Combo ticket includes the activity of the day for free in addition to all other hands-on, interactive WonderWorks exhibits, the Canyon Climb Ropes Course, and a game of Laser Tag.

The schedule for this year's WonderWorks Science Week is:

Monday February 20th – Weather Day – Local Syracuse meteorologist Kate Thornton is an Upstate New York native, and will return this year to give an informative presentation explaining the science of weather and her career in meteorology. Along with learning the new developments in Kate's field, guests will also be guided in weather related crafts and experiments! *Presentation at 1pm, crafts and experiments to follow.*

Tuesday February 21st – Comedic Science Day – Pete & Chris Amusements will have parents and children rolling with laughter. Performing two science-themed, high energy, magic shows, the comedians will sing, dance, and make the whole family smile. *Performances at 12:00PM and 2:00PM*

Wednesday February 22nd Animal Day –The Wild Animal Park in Chittenango will be back, and yes, bringing live animals! Guests will learn the little known facts and unique traits of each of these amazing creatures. *Shows at 12:00pm and 1:30pm*

Thursday February 23rd – Calling all tech lovers! Computer programming and STEM careers are on the rise. Microsoft will be hosting two 60-minute workshops, where kids will learn how to code, program, and play in a gaming world. *Workshops will be held at 11:00AM and 1:00PM*

Friday February 24th - Creativity and Imagination Day – Guests will participate in a friendly egg drop competition from 3 stories up! The WonderWorks team will provide materials to construct a vessel for an egg to land safely and prizes will be given to successful egg droppers! *Build your egg vessel in the party room at 11:00AM and 2:00PM*

Films like Oscar nominated *Hidden Figures*, and programs like *Kode with Karlie* by Supermodel Karlie Kloss, are inspiring kids and teens to get involved with the field they had never considered before. WonderWorks is proud to contribute to the growing and important movement to help students become more interested in science.

“Science week was a hit last year, and we are excited to bring back some partners from last year as well as a few new ones” said Ashley Doss, sales manager at WonderWorks Destiny. “We work tirelessly to come up with new programs like Science Week where we involve local businesses while educating and entertaining families.”

Science Week tickets can be purchased in advance online. While no purchase is necessary for those who buy a WonderWorks VIP Combo ticket, reservations must be made for ALL Science Week activities and all spots are first come first serve.
