**WonderWorks Panama City Beach Opens New Exhibit called
Totally Tubular: The Force of Air**

PANAMA CITY BEACH, Florida – (August 3, 2021) – Air is something we all need to survive, but most of us don't know much about it. WonderWorks Panama City Beach is opening a new exhibit that sheds light on this essential gas to give guests a better understanding of what it is and how it moves. The attraction's new exhibit will open on DATE, and it will be included in the regular admission price. This is just one of many exhibits WonderWorks features that helps guests learn about science in a fun and hands-on way.

"Families are going to really find this exhibit fun and interesting at the same time," said Michael Walsingham, general manager of WonderWorks Panama City Beach. "It's a great exhibit that will help people see how air moves around, and the kids are going to enjoy the interaction."

The new exhibit brings to life the concept of how air moves – something many guests have never thought about. It features a maze of tubes hanging from the walls and ceiling that guests can send colorful pieces of material -- dubbed "poofs" -- through to observe how the force of air moves through the maze.

In addition to giving guests a visual demonstration of how air moves, the exhibit's room is filled with fun facts about the air so everyone comes away learning something new. Guests will learn about what air is, how it moves, how it holds water, what sort of living organisms it contains, why there is no air in outer space, what gusts and bioaerosols are, and much more.

This new exhibit is one of the many STEAM (science, technology, engineering, art, and math) focused exhibits at WonderWorks Panama City Beach. STEAM-related exhibits are a focus at WonderWorks, as its mascot Professor Wonders hopes to provide guests with a fun and interactive way to learn more about science.

"We invite people to check out this new exhibit and learn something new about the very thing that keeps them alive," added Walsingham. "We love to help people learn, and we aim to also keep it interesting!"

WonderWorks Panama City Beach offers many STEM-focused exhibits and activities all year long. There are also demonstrations, activities, virtual learning labs, science fair partnerships, homeschool days, and more. To get more information about the

WonderWorks STEM programs, visit the website at:

<https://www.wonderworksonline.com/panama-city-beach/stem-programs/>.

The interactive indoor amusement park offers STEM-focused activities for all ages. There are over 100 hands-on activities, including the bubble lab, an interactive sandbox, the illusion art gallery, and Xtreme 360 bikes.
